

This product is covered with paper film, which has the following advantages compared with plastic film:

1. Paper film is more environmentally friendly compared to plastic film.
2. The cutting edges of paper film are smoother compared to plastic film.

You can use your nails or the push pin included with the product to remove the paper film (Lift the paper film from the edge).

The advertisement features a large image of a vibrant orange and black tarantula. At the top left is the brand logo "TWWTORO" with a small spider icon. Below the logo are six circular icons representing product features: 360° View, Ventilation, Lock, Easy Splice, PMMA EP, and C-R Acrylic. The text "360° FULL VIEW FOR CLEARER VIEWING" is displayed above the product name "Reptile Behavior Observation Box".

Invertebrate Amphibians Reptiles Habitat

A red circular graphic on the right side lists various creatures: Mantis, Frog, Snail, Insect, Lizard, and Spider, each accompanied by a small image.

The bottom section shows the assembly process of the observation box against a background of a spider's web. Eight numbered steps illustrate the construction:

- ① Fix the lock and the feeding hole cover to the top plate.
- ② Spliced back panel
- ③ Spliced base plate
- ④ Lower the board before splicing
- ⑤ Assemble the left panel
- ⑥ Install the inner upper board before splicing
- ⑦ Install the board before splicing
- ⑧ Assemble the right panel
